

## IMPORTANT INFORMATION REGARDING YOUR BABY'S AUDIOLOGY TESTING

Thank you for trusting us with your Audiological needs. Below is some important information to consider before and during your appointment.

### Before Testing:

1. Your baby will need to be sleeping soundly through the entire test. We have the greatest success with this when the following pre-test considerations are observed:
  - Wake your baby early on the day of testing and keep him/her from taking any naps prior to testing.
  - Try to not let your baby fall asleep in the car on the way to the appointment. If they do, wake them upon arrival so they are more likely to fall back to sleep for the test.
  - Bring 2 feedings with you and wait to feed your baby when you arrive at our facility. The second feeding will be reserved for the end of the test session as your baby will be scheduled over an entire feeding period and will be hungry when he/she wakes at the end.
  - Dress your baby comfortably.
  - Do not apply any creams, gels or lotions to the face or hair after the last bath before testing.
  - Bring extra blankets to swaddle your baby and pacifiers to help soothe them to sleep.
2. Please call your insurance company to verify coverage and understand your financial responsibility prior to testing. **We are out-of-network for all private insurance companies**, but can provide a detailed superbill to file with your insurance. Below is the information you may need:
  - NPI # - 1548505811
  - Tax ID # - 46-1353424
  - CPT Codes – 92587, 92567 and 92585
  - Diagnosis Code – H91.90, F80.0 or F80.2
3. All Medicaid claims will be filed and paid according to CMS guidelines, but will require an order from the primary care physician and possibly a waiting period for prior authorization. Please contact your PCP and have them fax an order to (770) 573-6399 for the above CPT and Diagnosis codes prior to testing.
4. Should you need to pay privately for today's testing, the fee is \$315. Payment plans will be considered on a case-by-case basis.

### During Testing:

1. Prepare to stay with your child for up to 2 hours to complete testing. You will likely hold your baby to sleep the entire time, but it may be possible for you to sit separately so please bring a book or something to occupy yourself during testing. It is not uncommon for parents to catch a short nap during testing once a baby has fallen asleep.
2. Please leave other siblings at home. We will need your assistance with the baby and do not have space to accommodate other children.
3. Please leave your cell phone in the "off" position. Even a phone on vibrate can interfere with the test.

Please don't hesitate to call or email if you have any questions. *Email is always best.*

We look forward to meeting you!
